

DEVELOPER VACANCY

DESCRIPTION

Your role would involve working as part of our small team of developers. We're a relaxed team who work on a wide variety of web-based projects. We value openness, idea-sharing and keeping a health work-life balance – as well as a geeky interest in all things techy and web-based. An eclectic taste in music would also be helpful ;-)

As our workload and client base is growing, we need to grow our team to meet demand for our services.

THESE ARE THE SKILLS & ATTITUDES WE'RE LOOKING FOR

- ☐ Experience in HTML, CSS & JavaScript is essential – these are the bread and butter of everything we do.
- ☐ Experience in C# & SQL would also be useful.
- ☐ An understanding of developing for multiple devices & screen sizes.
- ☐ A genuine keen interest in web technologies with the ability and desire to discuss, learn and grow.
- ☐ The ability to research & learn independently when needed.
- ☐ The ability to ask questions – we're far happier with someone who asks and gets it right rather than not asking and getting it wrong ;-)
- ☐ A basic understanding of general IT is a must: Operating systems, browsers, software, mobile platforms, tech companies, servers, networking etc.

HOW TO APPLY

Contact us on 01481 711296 or nemo@submarine.gg. If you think you have the attitude & skills we're looking for then we'd love to chat.
