utmost™

CYBER SECURITY

Be involved in the front line of security working in many different areas which help to protect all of our IT applications

INFRASTRUCTURE MANAGEMENT

Work in the team that provides the foundations for any IT software in use within the company. Our expert infrastructure team can help train you to become a future expert in what is a well saught after skillset

IT SUPPORT

The cornerstone of any IT department and still as relevant today as ever. The traditional "turn it off and on again" team will show you how in-depth and important this role actually is to the company (with a little off-and-on along the way)

BACKEND/FRONTEND DEVELOPMENT

These are the creative and technical minds of Utmost working together to create fast, efficient and well designed applications which are used by Utmost staff and all of our clients

QA TESTING AND AUTOMATION

The last line of defence and critical to the successful delivery of any changes deployed to our systems. Working in various areas including automation to provide business efficiencies across in a variety of business areas

ABOUT UTMOST WORLDWIDE

Utmost Worldwide is a part of the Utmost International group and specialises in offering life-insurance-based wealth management and employee benefit solutions to a global audience, including multi-national organisations, international expatriates and local resident populations in licensed territories.

The company's head office is based in Guernsey, with international offices in Singapore, Hong Kong, Dubai and Switzerland. In total we employ around 200 people, with 160 of these based in Guernsey.

Utmost Worldwide is part of the Utmost International Group, a leading provider of international life insurance across the UK, Continental Europe and the Middle East and we operate in over 15 key markets across the globe.

We have a wealth of opportunities available to help your career develop in the right direction

OUR IT DEPARTMENT

We employ around 30 people within our IT Department, across a range of skillsets covering management of infrastructure and platforms, software development and support, and management of business change.

Although we do use external consultants to assist us in some specific technical areas, the majority of our work is carried out by our in-house team. The IT Department is based in Guernsey, but provides services also to all of our international offices, and also liaises closely with the IT team in Utmost Pan Europe (based in Ireland) on a number of joint projects..

Most of our servers and databases are based on the Microsoft platform, and we manage approx. 300 servers in total. All are virtualized. We have a very strong emphasis on cyber security and use a number of tools and techniques to ensure stability of our platform with maximum protection.

We have several core systems which are delivered by external suppliers, and managed jointly between ourselves and our Irish colleagues.

Alongside these there is an extensive and complex landscape of additional systems, managed by the Guernsey team. Two of the most significant items are:

- An Online Service Centre with very extensive functionality, allowing our customers to view and transact over the internet
- A Data Warehouse used to consolidate data from our multiple systems for central reporting and analysis.

As a general direction we are moving forwards with as much digitization and automation as possible, to improve internal efficiencies. To help deliver this goal we are investing in technologies such as workflow, robotics and automated testing.

utmost

" A LEADING PROVIDER OF WEALTH AND CORPORATE SOLUTIONS "

STUDENT & GRADUATE OPPORTUNITIES

We are keen to grow organically, by recruiting young people and training them up. A range of options exist, depending on the interests and requirements of the individual concerned. For example:

- Work experience
- A 12 month internship allowing people to sample work across the different areas of the team i.e. infrastructure, software development, support and business change
- Direct employment in a specific area e.g. infrastructure or software development

WHAT WE ARE LOOKING FOR IN PEOPLE WE TAKE ON

We are seeking people who are bright and enthusiastic, with a strong interest in IT. In addition, good people skills are important, as is a willingness to work in a very dynamic environment – IT never stands still!

WHAT WE CAN OFFER TO SUCCESSFUL APPLICANTS

Excellent support and training in a wide range of industry standard technologies.

A dynamic working environment which is lively and friendly, but highly professional, and which encourages innovation and creative thinking.

Excellent career development opportunities - we encourage new recruits to take on more responsibility as soon as they are able to do so. We put the emphasis on capability more than hierarchy.
